Introduction

Dear Vestigians,

Many people believe that the year 2012 is slated to be a very significant year in the history of mankind. There are a variety of popular beliefs about this year, ranging from the spiritually transformative to the apocalyptic. In fact according to the calendar of the ancient Mayan civilization, 2012 marks the very end of the world, but on the other hand as per a few Indian spiritual beliefs 2012 is the end of the Kali Yuga, the degenerate age that we have been in, and the beginning of a the Satya Yuga, or the age of enlightenment. Whatever it is one chooses to believe, the fact remains that 2012 is only the second leap year since Vestige came into being, which for us is significant by itself.

As we wondered what 2012 has in store for us, we found inspiration in the letters LEAP themselves. We realized it helps us neatly encapsulate the journey so far as well as the road that lies ahead.

L is for Leadership – in thought, action, innovation and products

E is for Expansion – in geography, people, product range

A is for Anticipation – the changing landscape and tomorrow's needs

P is for Progress – the map that will show us the path to the future

Yes, my dear Vestigians, 2012 is really going to be our LEAP year, where we boldly make a quantum jump into the future, with absolute confidence in our vision, as well as our strengths and abilities to make our dreams a reality.

Naturally, this also means making some changes in our product strategy, keeping all the strengths intact and indeed improving, modernizing and enhancing their appeal to make them even more desirable. The outcome of this thinking is in the pages of this catalogue. The results speak for themselves.

Wish You Wellth.

Yours truly,

Gautam Bali
